The Ministry is currently undertaking a project for layout improvement of selected road intersections in Gaborone in order to facilitate smooth traffic flow as well as to improve pedestrian and cyclist safety. The Project entails

road markings of 89 intersections, construction of additional lanes at various strategic spots within the Greater Gaborone area. This is a World Bank funded project in collaboration with the Government of the Republic of Botswana.

The project will be implemented in phases and is currently at the design phase. Details of each phase are presented below.

- Phase 1 – Design and Construction of Road Intersections with major changes: Eighteen (18) calendar months from the start date of the Contract.
- Phase 2 – Design and Construction of Road Intersections with minor changes: Twenty-four (24) calendar months from the start date of the contract. It is noted that intersections of this portion may be delivered only after all intersections of separable portion 1 have been handed over to the Employer.
- A Defects Liability Period of twelve (12) calendar months. The Defects Liability Period will start for every intersection, after the handover Certificate, ensuring that the works have been completed in accordance with the contract specifications.
